

ACTIVITY

Your Experience

What do you already do in your role to keep children in your care safe?

Think about all of your roles in life: family member, community member, professional, and any other roles you might have.

What are your concerns now about your ability to engage with child sexual abuse prevention?

i.e. training, particular resource, time...

What are the barriers that you have encountered, observed?

i.e. uncertainty about having conversations, lack of knowledge, gaps in support, etc.
